PROFESSIONAL SUMMARY

Fresh graduate in Information Technology (GPA 3.73) with 1 year of experience as a Full Stack Developer, building end to end systems (backend API, web admin, mobile app) for fleet logistics and attendance management. Builds modern TypeScript applications with Next.js, React, NestJS, Prisma, Redis, and BullMQ, including real time WebSocket features, multi tenant data isolation, and CI/CD with GitHub Actions. BNSP certified Program Analyst (Software Development).

TECHNICAL SKILLS

Languages: PHP, TypeScript, JavaScript, Dart

Frameworks: Laravel, Next.js, NestJS, Flutter, TailwindCSS, Turborepo

Database & Messaging: MySQL, PostgreSQL, Prisma, Redis, BullMQ, Firebase

Tools & Practices: REST API, WebSocket, Git, GitHub Actions (CI/CD), PM2, Laravel Sanctum, Sentry

WORK EXPERIENCE

Full-Stack Developer (Internship) - PT Hamada Global Jaya

Oct 2025 – Sep 2026 | Depok, West Java

- Built an attendance and fleet management system (Laravel API, indexed MySQL) validated by QR code and GPS, giving operations verified real time driver check in records
- Kept field reporting running in low signal areas with an offline first Flutter app (local Sembast database, automatic sync)
- Moved fleet upkeep from reactive to planned with automated maintenance scheduling, vehicle health scoring, and FCM push alerts
- Streamlined service report approval with a tiered workflow for admin service and customer roles
- Secured web and mobile authentication with Laravel Sanctum and added Sentry error tracking for proactive issue resolution

Web Developer (Freelance) - PT Multi Kreasi Printing

May 2024 – Aug 2025 | Depok, West Java

- Built custom mobile responsive digital invitation websites for clients using WordPress, HTML, CSS, and JavaScript featuring RSVP forms, countdown timers, and dynamic galleries
- Designed promotional print banners for customers and analyzed manual shop workflows as a real world case study to architect a full scale printing ERP prototype (www.mkprinting.my.id)

PROJECTS

AI Standup - Async Standup & Team Summary Platform (www.aistandup.app)

Next.js 16, NestJS, Turborepo, Prisma, PostgreSQL, Redis, BullMQ, WebSocket

- Architected a fullstack monorepo application using Next.js 16, NestJS, and Turborepo, serving async team standup workflows with automated AI summaries
- Implemented bidirectional WebSocket communication to deliver real-time team attendance and blocker alert updates directly to the client dashboard
- Engineered asynchronous background processing pipelines using Redis and BullMQ to offload AI prompt evaluations and notification dispatches without blocking HTTP responses
- Enforced strict multi tenant data isolation using custom NestJS guards and workspace-scoped Prisma queries

Multi Kreasi Printing (MKP) - Enterprise Operations Platform (www.mkprinting.my.id)

NestJS, PostgreSQL, PgBouncer, Redis, GitHub Actions, PM2, Azure VM

- Built an end-to-end commercial printing management system connecting customer ordering portals with internal production tracking workflows
- Optimized database resilience by implementing PgBouncer connection pooling and Redis rate-limiting guards to prevent connection exhaustion during concurrent order spikes
- Designed a 3 stage GitHub Actions CI/CD pipeline deploying to an Azure VM with zero downtime PM2 process reload and automated health verification

EDUCATION

Bachelor of Information Technology - Universitas Bina Sarana Informatika (UBSI), 2022 - 2026, GPA 3.73

CERTIFICATIONS

- Program Analyst, Software Development Competency Scheme - BNSP, 2025
- Scrimba (2026): Fullstack Developer Path (108 hrs), Advanced React, AI Engineer Path
- Dicoding (2025): Front-End Web, SQL, JavaScript & Web Programming, DevOps Fundamentals
